

Ultimate? Indeed.

Meet the **Statement 42 Ultimate**

The most advanced v-bottom in the industry.

STATEMENT!

Exclusive "Air Cushion" Cockpit.

Not only is she a sight to behold, but she feels good, too. Of course, we're talking about Statement's patented, auto-leveling, "Air Cushion" floating cockpit suspension system - an advanced technological feature you won't find anywhere else. The 42 Ultimate's Air Cushion Cockpit absorbs the pounding of offshore conditions so you'll stay comfortable, calm, and collected; throttling ahead in conditions that would make those in lesser boats change course for calmer seas. So go ahead and give her all you've got. She won't mind a bit.

Take Charge.

The 42 Ultimate features an ergonomic, sports-car helm with ideal placement of steering wheel, instruments, and controls. Nestled into a custom-fitted, contoured performance bucket seat behind a wraparound acrylic windshield, with up to 3,000 available horsepower under your command, you'll have the world at your fingertips in the Statement 42 Ultimate.

Fanatical Attention to Detail.

Every piece of hardware on the 42 Ultimate is the result of obsessive engineering and meticulous craftsmanship. These concealed, hydraulic engine hatch hinges are overbuilt yet elegant, and they're just one example of the thinking that goes into each Statement built. From bow to stern and everywhere in between, beautifully-finished surfaces and lavish details abound, making every Statement a brilliant work of high performance art!

Your Own Personal Statement!

We understand that maybe backlit cowboy skulls aren't for everyone. That's why each and every Statement 42 Ultimate is built to the exacting specifications of its proud new owner. At Statement, we don't just build boats. We create sophisticated high-performance masterpieces that uniquely reflect the spirit, personality, and style of the individuals for whom they are made. When you're ready to make a Statement of your very own, give us a call.
